DETAILED ACTION

1. The final rejection (mailed on 28 March 2006) is withdrawn in favor of the new grounds of rejection set forth below.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 2, 3, 5, 6, 24, 28, 29, 31, 32, 36, 37 and 51 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The limitations set forth in claim 28, lines 19-24, claim 36, lines 12-16 and claim 51, lines 13-18 are not supported by the originally-filed specification and thus, these limitations constitute new matter.

4. Claims 2, 3, 5, 6, 24, 28, 29, 31, 32, 36, 37 and 51 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains

Art Unit: 1732

subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The originally-filed specification does not state or teach one of ordinary skill in the art what causes the filaments to be naturally reoriented into a plane which is generally parallel to the longitudinal axis of the core member (note claim 28, lines 21-23; claim 36, lines 14-15; claim 51, lines 16-17). Without this disclosure one of ordinary skill in the art could not practice the claimed invention.

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 2, 3, 5, 6, 24, 28, 29, 31, 32, 36, 37 and 51 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The expression "naturally reoriented" (claim 28, line 21; claim 36, line 14; claim 51, line 16) renders the claims indefinite principally because it is not clear what applicant intends to cover by such a recitation (and there is no guidance

Art Unit: 1732

in the originally-filed specification as to the meaning of "naturally reoriented").
